Are you old enough to remember when the Letcher fire truck was in the brick building south of the town hall? The jail cell was in there also. Or are you of the vintage when the fire hall was east of the post office on Main Street and could only hold two trucks? The public restrooms were new too. Or, are your memories of the fire hall when it was on the Northwest end of Main Street and included a community room?

Progress and necessity; we are at that point again.

The Letcher Fire Department and area fire districts are undertaking a fund drive so we can add an addition to the north side of the current fire hall and community center to double our size. This allows us to reuse materials and utilize some of the amenities that already exist. No additional real estate will need to be purchased.

The department has more equipment than the current structure can safely and appropriately house. The Community Center is just not large enough to hold family gatherings, reunions and receptions. Therefore, this letter comes with our encouragement for you to join us in making this fund raising activity happen. We have plans that will need approximately \$200,000 for the building and additional funds to furnish the inside. Some work will be done and possibly donated by local patrons.

For more information, call Myron Sonne at 605-933-0393 or email at nlsonne@santel.net for more information. We would be glad to show you some photos of what we have and what we hope to build. Your tax deductible donation will help create greater efficiency and quicker response times to fires and/or emergencies.

A can of your favorite beverage daily tallies \$365/year. What is the value of a quick efficient Letcher Fire Department worth to you in case of fire or emergency? What is the value of your car, your combine, your home? Consider your tax deductible donation towards a more efficient fire hall and expanded community center your part in making the Letcher area a safe and welcoming place to call home.

Thank You!

Please complete this section and return it as soon as possible. Our goal is to begin the building process this Fall 2014.
